Notes:	<ul style="list-style-type: none"> - NDT series displays are made with aesthetic anodized aluminum frame of gold color. - In case of interest we also offer hardwood oak frame (price is the same as gold color aluminum frame). - Displays are powered from 230 VAC outlet (power supply cable is included with delivery). - Readability range is the maximum reading distance of LED display assuming good eyesight. * Mini-display NDT 38/x R is mainly used as a control display for wireless RF data transmission into large displays. It is not recommended to use it as the main hymn display
