Notes:

- NDT series displays are made with aesthetic anodized aluminum frame of **gold** color.
- In case of interest we also offer hardwood oak frame (price difference is indicated in the price table above).
- Displays are powered directly from 230 VAC outlet (power supply cable is included with delivery).
- Readability range is the maximum reading distance of LED display, assuming good eyesight.
- * Mini-display NDT 38/x R is mainly used as a control display for wireless RF data transmission into large displays.
It is not recommended to use it as the main hymn display

Delivery conditions:

- The specified prices are in EUR excluding VAT, delivery condition – ExW Presov-Lubotice.
- Shipping cost is not included in the price, it can be quoted separately base on the order quantity.

Readability range:
