# ELEN

CDN Series Displays
Wall Mounting Instructions

Display was shipped with a wall mounting bracket pre-installed on the back panel.
Please follow these instructions to install display on the wall using its mounting bracket.

1

Cross/Phillips type screwdriver

Place display on the table, facing down. Loosen two securing screws from mounting bracket (screws do not have to be removed). Remove wall mounting bracket from display's back panel by moving it to the right side and pulling it away.
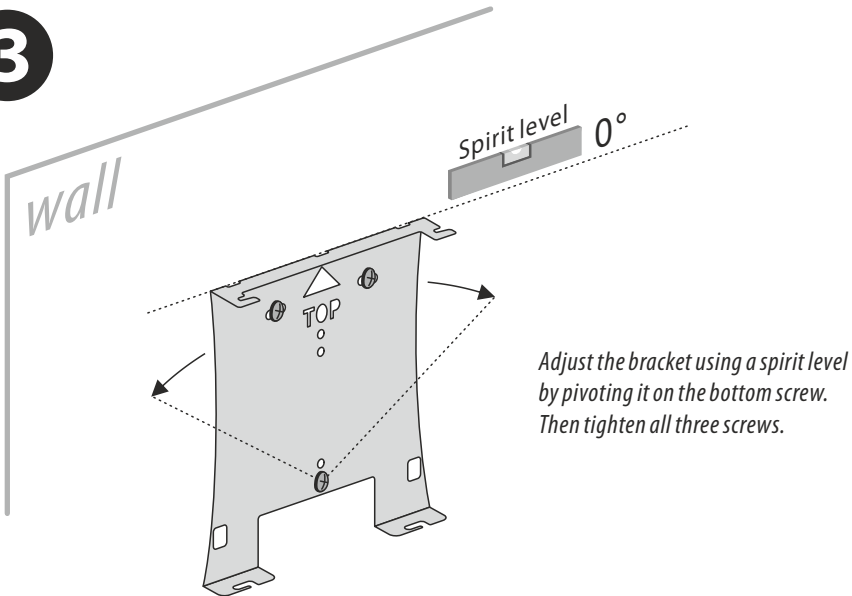

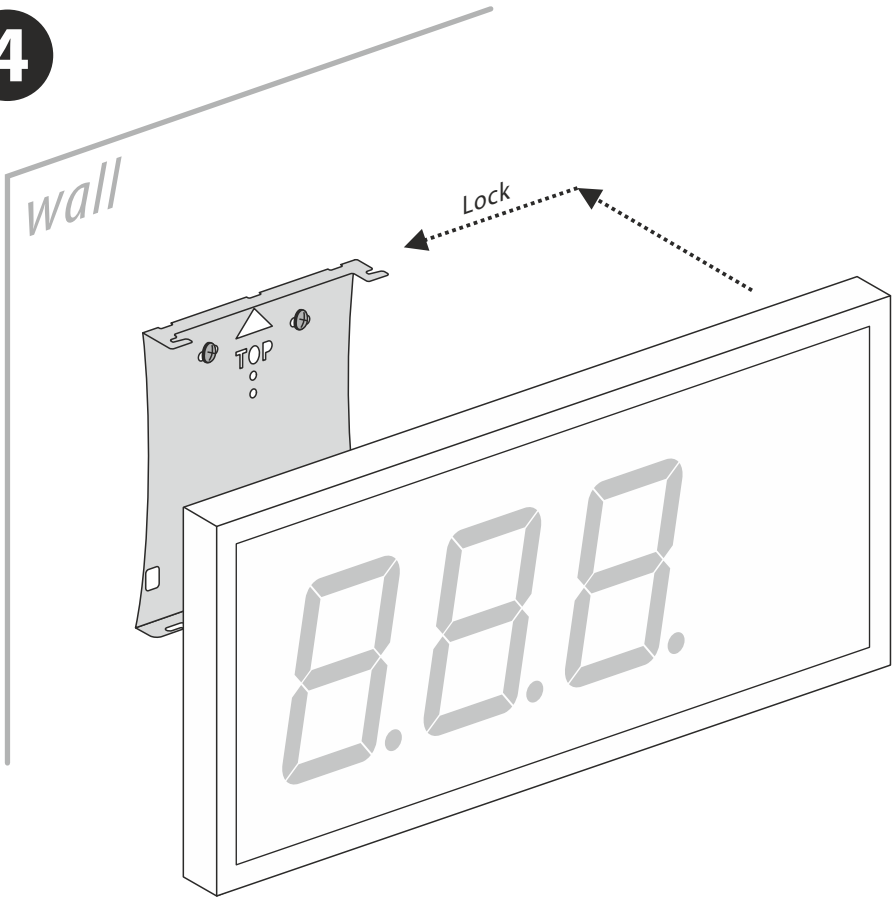

2

wall

*Place the mounting bracket to desired position on the wall. Using bracket as a template, mark center positions and drill three mounting holes. Use drill bit with diameter **8** mm. Insert screw fasteners and secure the bracket with three screws, but do not tighten the screws.*

wall

Spirit level 0°

TOP

Adjust the bracket using a spirit level by pivoting it on the bottom screw. Then tighten all three screws.
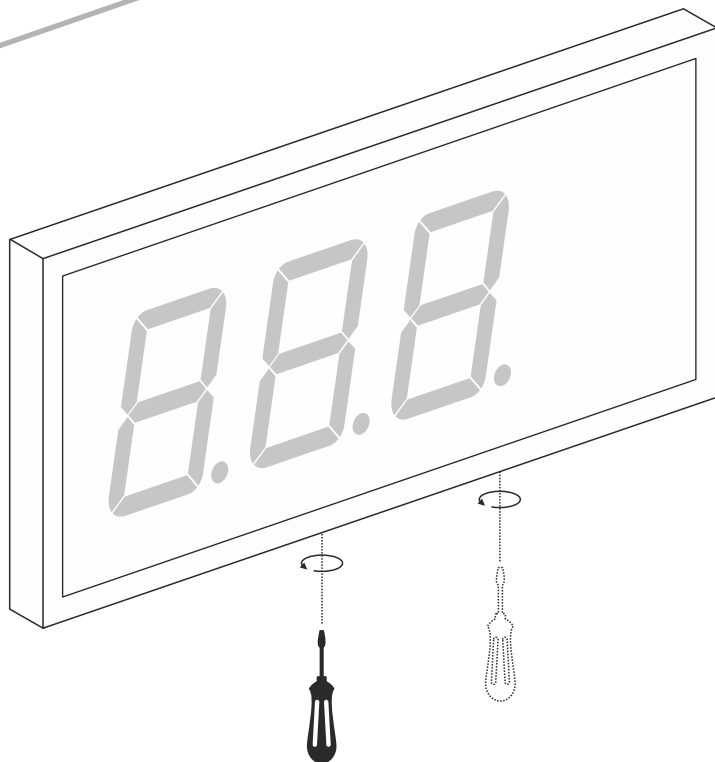

4

wall

Lock

TOP

*Insert display onto the mounting bracket
and latch it in by moving it to the left side.*

5

wall

*Tighten two securing screws,
which were loosened in **point 1**.*
